

INVITATION

ADAPT Corporation presents a half day free Seminar on:

**LATEST ADVANCES IN POST-TENSIONING
DESIGN SOFTWARE AND PRACTICE**

- become more productive and improve quality -

Dubai Press Club – Tuesday, November 14, 2006

Purpose of Seminar

This FREE half-day seminar is designed to give the practicing engineer in UAE information about latest design software and practices used to increase design productivity and improve quality. Special topics covered will include:

- Optimization of post-tensioning design process using ADAPT design software
- Efficient creation of rebar drawings
- Automated creation of post-tensioning shop drawings
- Integration with ETABS and design of slab for lateral loads

All presentations will be based around live product demonstrations of ADAPT software.

Seminar Faculty

Dr. Florian Aalami is Executive Vice President of ADAPT Corporation and is responsible for the company's overall product development strategy and international business development activity. Dr. Aalami holds a Ph.D. in engineering from Stanford University.

Ms. Carine Magalhaes is Manager of Engineering Services at ADAPT Corporation. Her responsibilities include the management of the company's global engineering services projects. Her extensive post-tensioning design experience includes many projects in UAE.
